

LEUKAEMIA [BLOOD CANCER] - INTRODUCTION

- A Cancer of the Blood Forming Tissues, including the Bone Marrow and the Lymphatic System. Many types exist such as - Acute Lymphoblastic Leukaemia, Acute Myeloid Leukaemia and Chronic Lymphocytic Leukaemia.
- Some forms of Leukaemia are more common in Children. Other forms of Leukaemia occur mostly in Adults. Leukaemia usually involves the White Blood Cells [Erythrocytes], and these WBCs are considered as potent infection fighters - normally grow and divide in an orderly way, as your body needs them. But in presence with Leukaemia, the bone marrow produces an excessive amount of abnormal blood cells, which don't function properly.
- Treatment of Leukaemia can be complex - depending on the type of Leukaemia and other factors. But there are strategies and resources that can help make the treatment of Patients successful.
